PROFESSIONAL SUMMARY

B.Tech CSE student in my 6th semester at Jharkhand Rai University, focused on building things that actually work. I have hands-on experience with the MERN stack and have worked on AI/ML projects including a CNN-based brain tumor detection system with 92% accuracy. I enjoy solving real problems through code — whether it's a clean frontend, a working backend, or an ML model. Still learning, but serious about it.

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript

Web Development: React.js, Node.js, Express.js, MongoDB (MERN Stack)

AI/ML: CNN, FastAPI, Jupyter Notebook, TensorFlow

Core Concepts: Data Structures & Algorithms, OOP, REST APIs

Tools: Git, Postman, VS Code, NPM

PROJECTS

MRI Brain Tumor Detection with Gesture Control

Python, CNN, FastAPI, Jupyter Notebook

AI-powered medical imaging system that detects brain tumors from MRI scans with gesture-based touchless controls.

- Built a CNN model for MRI image classification achieving 92% accuracy
- Developed backend using FastAPI to serve real-time model predictions
- Integrated gesture-based controls for touchless interaction — zoom, navigation, and selection
- Designed a contactless system suitable for sterile medical environments

Netflix Clone — Frontend

HTML, CSS, JavaScript

A responsive frontend clone of Netflix's homepage built using core web technologies.

- Designed pixel-perfect UI replicating Netflix's homepage layout and styling
- Implemented responsive design for seamless viewing across mobile and desktop devices
- Built interactive elements including hover effects, navigation bar, and movie carousels using vanilla JavaScript

EDUCATION

B.Tech in Computer Science Engineering

Jharkhand Rai University, Ranchi | CGPA: 8.09/10 (up to 5th Semester)

2023 – 2027

Key Project: MRI Brain Tumor Detection — CNN-based classification achieving 92% accuracy with gesture-controlled interface

CERTIFICATIONS & ACHIEVEMENTS

- 3rd Place — Innovatia: The Model Revolution | Jharkhand Rai University, Ranchi: Secured 3rd position in college-level tech model competition demonstrating innovation and technical skills
- Tata ESG Job Simulation – Forage (November 2025): Completed practical tasks in client needs analysis, sustainability solutions, and fitment matrix presentation
- Internshala Student Partner (ISP) – Selected as Student Partner (November 2025): Representing Internshala at Jharkhand Rai University to connect students with internship opportunities
- Web Hackathon Challenge – IIT Bhubaneswar: Participated in competitive web development hackathon organized by Indian Institute of Technology, Bhubaneswar
- AI Tools & ChatGPT Workshop – be10x (July 2025): Completed workshop on AI tools, ChatGPT, data analysis, and AI-assisted coding & debugging
